

Dowel Bar Sleeves & Cap

Dowel Bar Sleeves

Dowel Bar Caps

Dowel Bar Sleeves

Engineered as an effective and efficient solution for debonding mild steel dowel bars, this sleeve offers a faster, cleaner alternative to traditional debonding paint. Easy to install and handle, it allows contractors the flexibility to apply it at their convenience, streamlining the process without compromising on performance.

Diameter	Length	Pack of
32 mm	300 mm	5000 Nos
32 mm	330 mm	5000 Nos
32 mm	350 mm	5000 Nos
36 mm	300 mm	5000 Nos
36 mm	330 mm	5000 Nos
36 mm	350 mm	5000 Nos

Plastic Grade : Virgin Material

HSN Code : 3923

Note : All size are for Dowel Bar OD, its ID are 1.5mm more for Dowel Bar OD

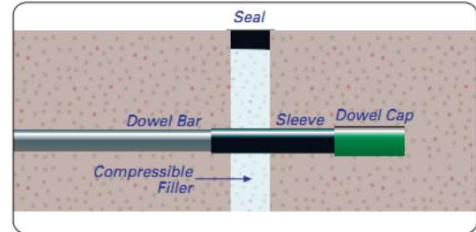

Our dowel bar sleeves serve as a highly effective method of debonding mild steel dowel bars, enabling essential horizontal joint movement without compromising structural stability. Crafted from premium, flexible materials, these sleeves

- Provide an efficient, clean alternative to traditional debonding paints.
- Are quick to fit and easy to handle, allowing convenient installation at any stage of the project.
- Ensure long-term performance by preventing unwanted bonding, effectively reducing the risk of cracks in concrete joints.

Dowel Bar Caps

Crafted for quick and easy application, this cap accommodates joint movement during expansion when paired with sleeved dowel bars. It comes equipped with a compressible filler end, ensuring flexibility and reliable performance in dynamic conditions.

Diameter	Length	Pack of
32 mm	100 mm	5000 Nos
36 mm	100 mm	5000 Nos

Mitro Industries dowel bar caps are designed to accommodate joint expansion and movement in concrete structures. Each cap is made from virgin-grade materials and is fitted with a compressible filler end to maximize flexibility. These caps

- Ensure joint movement during concrete expansion, preserving the structural integrity of pavements and slabs.
- Are easy to apply, delivering secure performance when used with sleeved dowel bars.
- Provide a robust, dependable solution for long-term joint protection, preventing joint deterioration over time.

Mitro Industries is proud to offer high-quality Dowel Bar Sleeves and Dowel Bar Caps made from virgin-grade materials. Designed to provide exceptional durability and flexibility, our dowel bar solutions ensure efficient load transfer and structural integrity in concrete joints, making them essential components in road construction, pavements, and other heavy-duty concrete applications.

Why Choose Mitro Industries?

With a focus on quality and innovation, Mitro Industries uses only the finest virgin-grade materials to manufacture our dowel bar sleeves and caps, ensuring products that stand up to rigorous use. Our commitment to excellence has made us a trusted name in construction solutions, with products known for their premium quality, ease of application, and durability.
